CARPO . Litter Receptacles

The CARPO litter receptacle integrates neutral styling with functional design to harmonize with a variety of architecture. Its sloped top and reduced opening for disposal combine to shield against the elements. The hinged door with triangular locking mechanism allows side access for ease of emptying. An internal retaining ring secures litter bags in place. The fabricated steel housing and mounting post are hot-dip galvanized for long-term corrosion protection, then finished in finely textured paint. Two sizes are available to suit a variety of applications. Mounting choices include flanged or embedded models for ground installation or an integral bracket for wall mounting. Optional ash receptacle is available on request. Standard colors; matte silver grey metallic, dark grey, graphite grey or black. Special colors available. All hardware is stainless steel.

Model	Mounting	Capacity
CP380	Flange Mount / Embedded	16 Gallons
CP380W	Wall	16 Gallons
CP440	Flange Mount / Embedded	24 Gallons
CP440W	Wall	24 Gallons
