POSITANO . Illuminated Bench

POSITANO represents a new concept in seating by adding color and illumination. Constructed of 3/4" thick clear tempered glass, the bench combines style and function. The inner surface of the glass is sandblasted to make it translucent, then screen printed with a block pattern. Anti-slip squares on the exterior surface mirror the inner pattern to produce a three-dimensional effect. Matte acrylic panel within the bench evenly diffuses and mutes the light source located in the recessed stainless steel housing. Standard light colors are red, green, yellow, blue and white. All hardware is stainless steel. Uses  recognized components.

Model	Dimensions	Lamp
PS700	27.6"l x 15.8"w x 15.9"h	LED / RGB / 17w T8 FL
