SIERRA SE6500 . Illuminating Column

The SIERRA column possesses the scale to effectively accent large outdoor spaces with either white light, or with static- or color changing LED effects. Its simple cylindrical form adds structure to open spaces or complements architecture. Light diffuses uniformly along the full length of the acrylic lens through direct and indirect optical components. The luminaire body is fabricated from high quality extruded aluminum. It is available with a horizontal or diagonal cut at the transition to the lens. Lamping includes ceramic metal halide or LEDs. Colors can be red, blue, green, or RGB with sequencing or DMX control capability. All hardware is stainless steel. Standard colors; matte silver grey metallic or graphite grey. Special colors available.  Listed for Wet Locations.

Model	Height	Lamp
SE6500	21'	150 MH / LED / RGB
SE6500G	21'	150 MH / LED / RGB
