## TOLEDO . Utility Bollard

The TOLEDO utility bollard is available in two sizes to deliver appropriately scaled solutions for locating electrical or water supply points in exterior landscapes. The domed top is cast aluminum and fastened to the hot-dip galvanized shaft with concealed hardware prior to being finished in finely textured paint. Access doors are flush to the bollard shaft and secured with lock and key to ensure safety and prevent unauthorized entry. Power bollard features an integral chute for cables to allow closed door operation while in use. Electrical chassis is provided for installation of electrical components. Electrical design, components, and installation are by others per applicable codes. Water bollard is designed for open door operation with plumbing and fittings supplied by others. Bollards mount to factory supplied galvanized steel soil insert embedded into a concrete foundation, by others. Companion lighting products include pole and wall mounted luminaires as well as an illuminated bollard in the Montego product family. Standard colors; matte silver grey metallic, dark grey, graphite grey, or black. Special colors available. All hardware is stainless steel.
