CENTO 780. Illuminating bollard / column

Cento enhances pedestrian scale spaces with soft diffused illumination and understated styling in a simple cylindrical form. The luminaire with full-length lens and 180-degree aperture is available as a 36" stand-alone illuminating bollard, or as a pedestrian-scale column when combined with an extruded aluminum shaft in overall heights of 8' or 10'. LED models with field replaceable light engines are available in 3000K or 4000K color temperatures. Luminaire housings are machined from heavy-wall aluminum extrusions, giving the luminaire a stylish, yet structural, installed appearance. Luminaires are finished in finely textured paint. All hardware is stainless steel. Standard colors; matte silver grey metallic or graphite grey. Special colors available.

Model	Height	Lamp
CN780	35.4"	LED / 60CF
CN780C	8', 10'	LED / 60CF
