## ACCADIA R. In-ground Luminaire

ACCADIA satisfies architectural façade lighting and accenting requirements through precision optics and refined styling. The round, clear tempered glass lens with black screen printing is bonded flush to the stainless steel luminaire housing, showing no visible hardware for an elegant appearance. High power, illumination grade LEDs paired with sophisticated faceted reflectors deliver uniform illumination free of striations. The optics may be adjusted to one of four positions for optimal illumination and may be factory set on request. Fixed symmetric optics for uplighting also available. The in-ground luminaire is available in two diameters to meet varying lighting and scale requirements. Luminaire is prewired with cable to allow easy installation into the stainless steel installation box without opening the luminaire. CSA certified for Wet Locations.

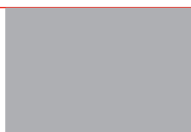

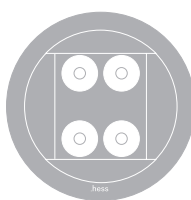

Model	Diameter	Source
ACR220	8.7"	LED
ACR300	11.8"	LED

Ø 8.7" Luminaire  
Ø 8.9" Rough-in Box
