D A L V I K S . Pole Mounted Luminaire

Sophisticated styling cues of DALVIK contrast a slender profile and concealed hardware with two distinctive reveals to highlight the luminaire's simple dayform. The cast aluminum housing and fitter transition cleanly to the pole for a pleasing aesthetic appearance. The fully shielded luminaire emits zero uplight making it suitable for all LEED lighting zones and Dark Sky applications. Luminaire is available in single or twin mount configurations on round straight poles in aluminum or steel. Steel pole is hot-dip galvanized prior to painting for proven long term corrosion resistance. All hardware is stainless steel. Standard colors; matte silver grey metallic or graphite grey. Special colors available. Companion wall and column mounted luminaires complete the product family.

Model	Pole	Lamp
DAL650S	15' or 20' Round Straight	LED
