M O S A I C . Illuminating Column

Inspired by nature, MOSAIC adds a dramatic visual element to a wide range of architecture day or night. The illuminated column is fabricated from aluminum extrusions with precisely cut patterns for a sophisticated presentation. The decorative panels are illuminated from within by a single luminaire which directs light outward. LED light sources may be static white or single colors for simple ambiance. Dynamic light sources are available in RGB, RGBW, or tunable white to create colorful scenes and effects when using onboard sequencing or interfaced with external DMX control systems. Column finish may be finely textured matte silver grey metallic, dark grey, graphite grey, or black. Special colors and anodized finishes available on request. Consult factory for optional accent lighting or custom patterns. All hardware is stainless steel. CSA Certified for Wet Locations.

Model	Motif	Height	Lamp
MSC300-P	Palm	10' / 12' / 14'	Static or Dynamic White, Monochrome LED, RGB, RGBW
MSC300-I	Ice Bloom	10' / 12' / 14'	Static or Dynamic White, Monochrome LED, RGB, RGBW
MSC300-R	Reed	10' / 12' / 14'	Static or Dynamic White, Monochrome LED, RGB, RGBW
MSC300-N	Nautilus	10' / 12' / 14'	Static or Dynamic White, Monochrome LED, RGB, RGBW
MSC300-F	Fracture	10' / 12' / 14'	Static or Dynamic White, Monochrome LED, RGB, RGBW
