# BOLLARD

A circular opening punctuates the slender rectangular form of the **PORTAL BOLLARD**, creating a striking visual. The satin anodized ring featuring a beveled profile houses the clear acrylic band, which distributes light from recessed LED sources. Bollard is available in warm or neutral white color temperatures. Concealed mounting plate assembly delivers a clean, flangeless appearance. All hardware is stainless steel. Standard colors; matte silver grey metallic or graphite grey. Special colors available. CSA Certified for Wet Locations.

# EXIT BOLLARD

The **PORTAL EXIT BOLLARD** delivers an exterior rated architectural solution for visual guidance and messaging. Suitable for outdoor applications ranging from rooftop pool decks and gardens to courtyards, the slender rectangular profile integrates comfortably into a variety of architecture. The extruded aluminum bollard is available with green or red lettering to meet local code requirements. Custom signage or patterns may also be incorporated on request. Concealed mounting plate assembly delivers a clean, flangeless appearance. All hardware is stainless steel. Standard colors; matte silver grey metallic, dark grey, or graphite grey. Special colors available. CSA Certified for Wet Locations and UL924 standards.

# COLUMN

**PORTAL COLUMN** adds a unique visual accent to architectural feature spaces with its striking linear simplicity juxtaposed with the circular aperture. Functional illumination is provided by concealed LED light engines projecting through the clear acrylic ringed lens. The column may include optional marker lights at the base to provide added pathway illumination with either diffused or controlled optics. The extruded aluminum body can be 8' or 10' in height. It has a concealed mounting plate assembly to deliver a clean, flangeless appearance. All hardware is stainless steel. Standard colors; matte silver grey metallic, dark grey, or graphite grey. Special colors available. CSA Certified for Wet Locations.

# RECOGNITION

The **PORTAL ILLUMINATING COLUMN** has garnered many prestigious awards including the 2018 selection in both Architectural Products and Architectural SSL Magazine's annual Product Innovation Awards (PIA), LightFair International's 2018 Best of Category Award; and the inclusion in the Illuminating Engineering Society (IES) 2018 Annual Progress Report.

The **PORTAL EXIT BOLLARD** was also selected for inclusion in the 2018 IES Progress Report. Additionally, it was judged a winner in the 2018 Architectural Products annual Product Innovation Awards, and additionally received a Special Citation in the Hospitality category as having a "very subtle and unobtrusive design, yet effective in nature".

# BENCH

Circular openings framed by satin anodized machined aluminum rings add a visually elegant appearance to the **PORTAL BENCH**. Sustainable black locust slats for the seat impart a rich texture to the overall presentation and may include an optional concealed wireless charging station making it very suitable for public spaces found in municipality properties, parks, retail, and other pedestrian venues. Complementary illuminating columns and bollards provide a cohesive design solution for exterior and interior feature spaces. All hardware is stainless steel. Wood is harvested using sustainable cultivation practices and is FSC Certified.

# ILLUMINATED BENCH

Subtle illumination from low-wattage accents adds ambience to evening settings with the **PORTAL ILLUMINATED BENCH**. Two circular light sources on the narrow faces of each vertical pillar adds soothing pools of light surrounding the bench space in warm or neutral white light. Complementary illuminating columns and bollards provide a cohesive design solution for exterior and interior feature spaces. All hardware is stainless steel. Wood is harvested using sustainable cultivation practices and is FSC Certified.
