WHY?

MOSAIC

SETS THE SCENE

Available in a selection standard patterns and can be easily customized with a unique design of the client's imagination.

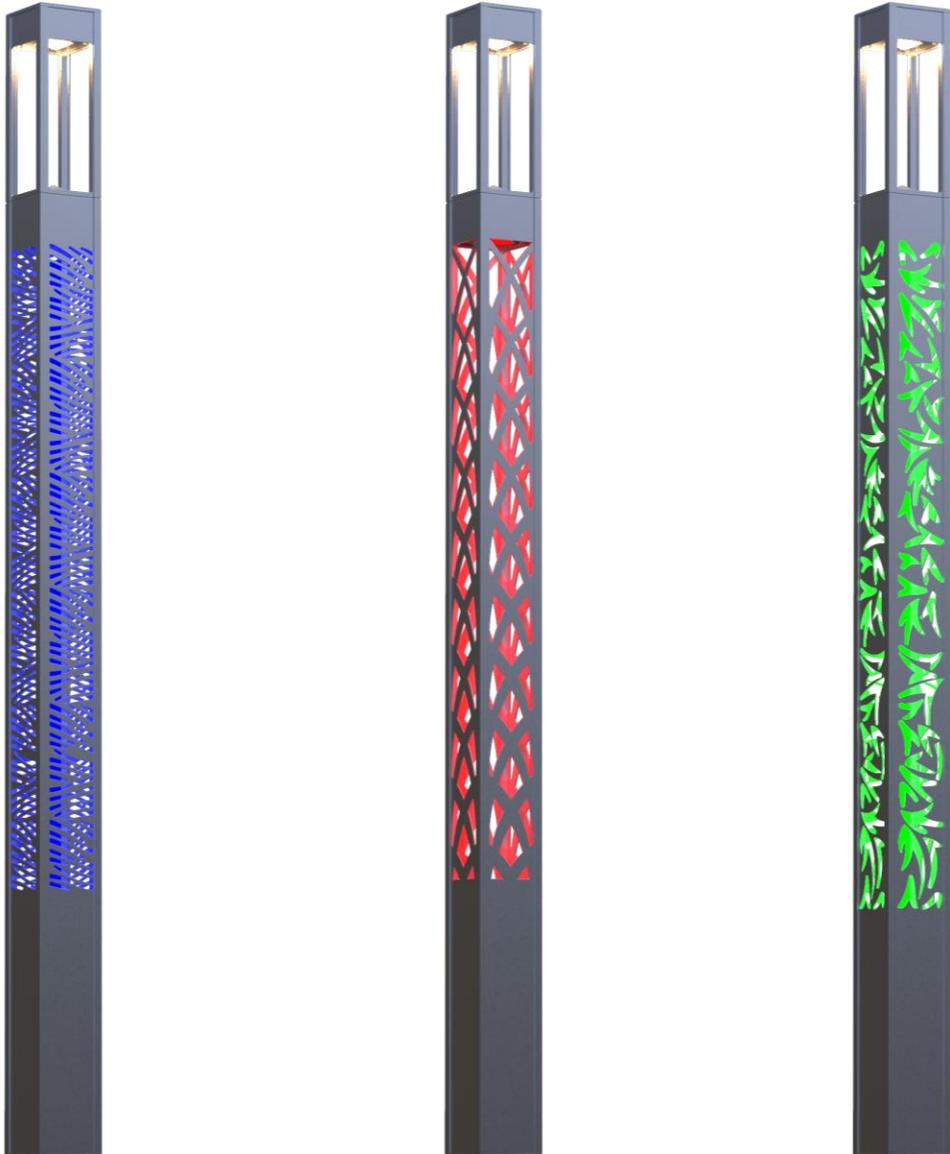

WHY?

MOSAIC

BEAUTIFUL

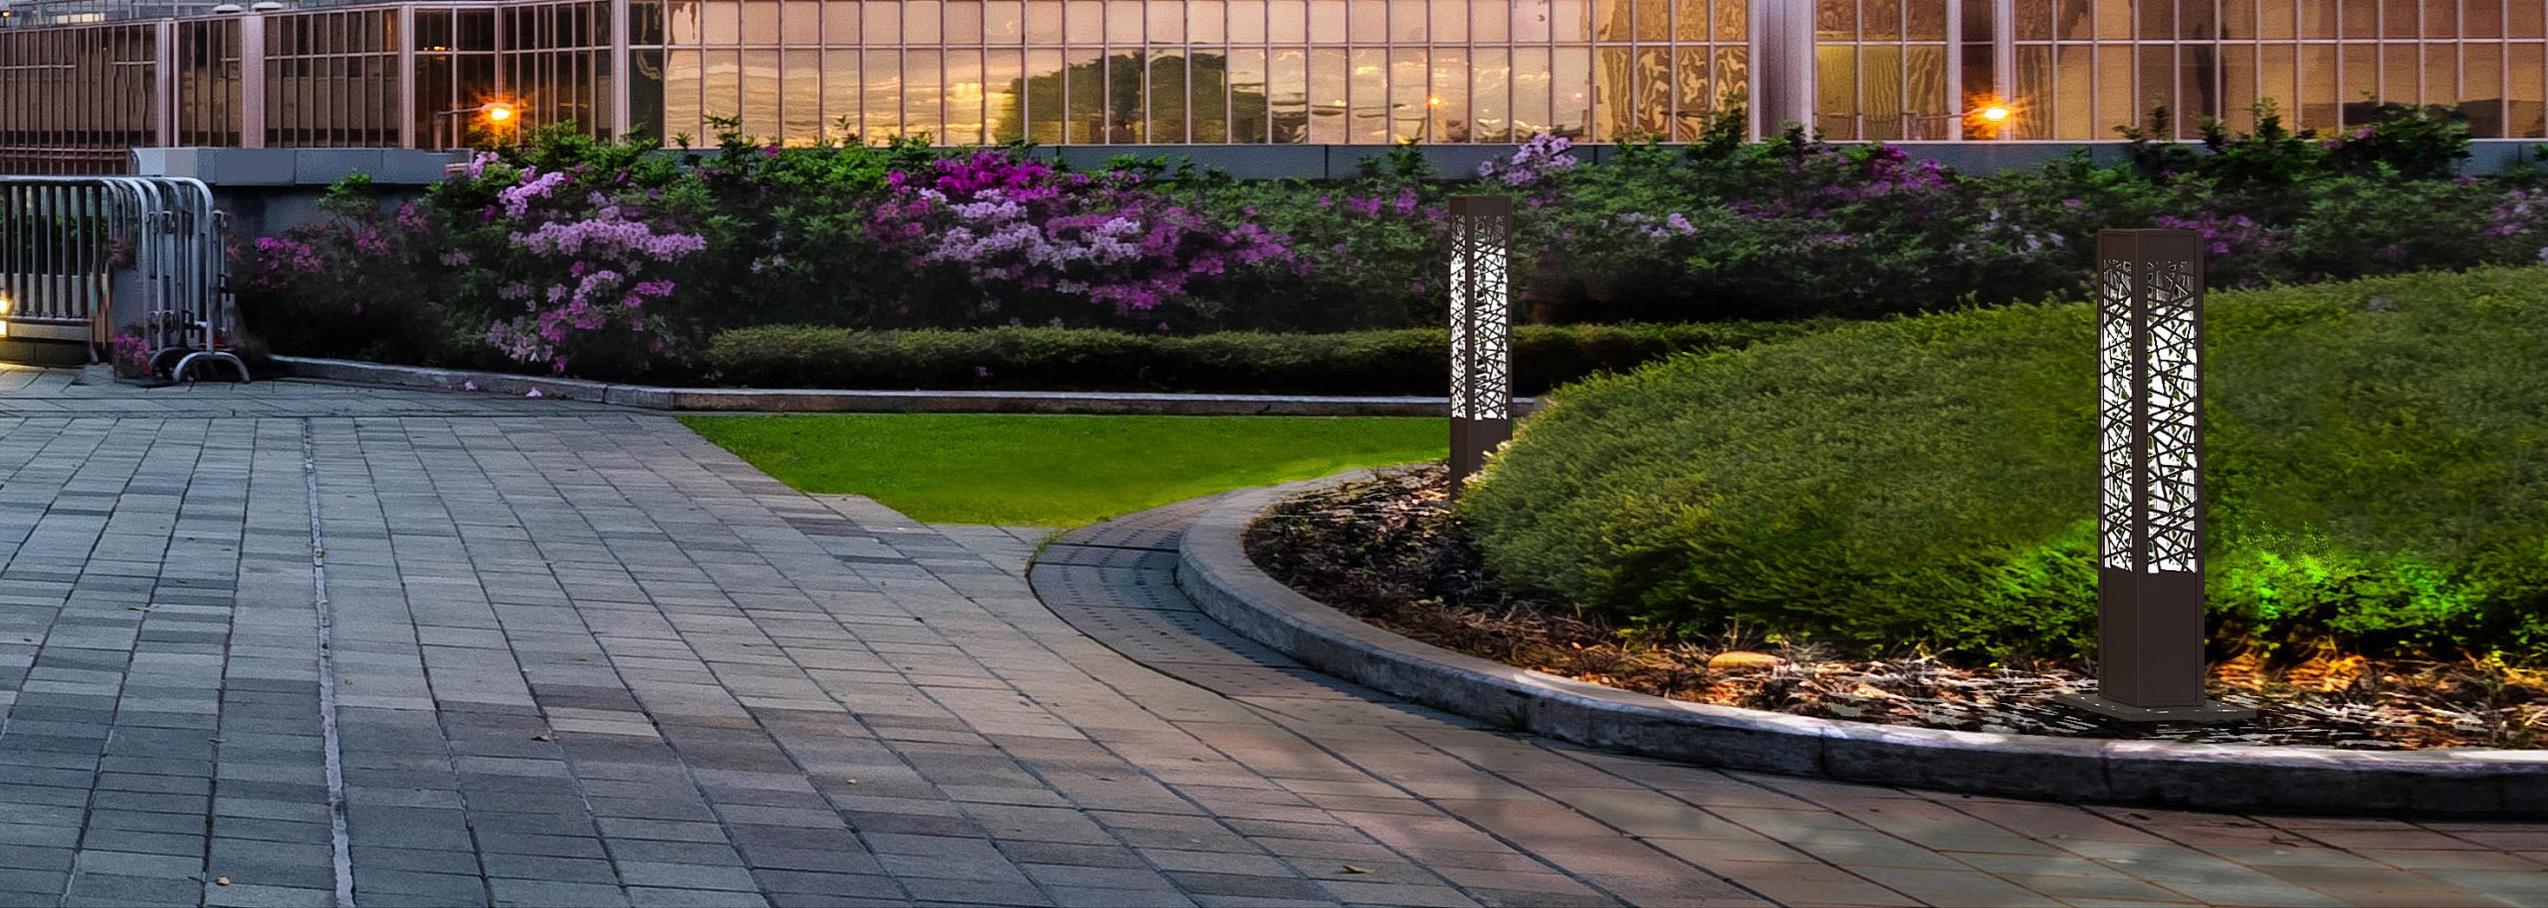

Provides artistic illumination to enhance a space either alone as a single fixture type, or the different column variants together to handle specific lighting requirements while adding a memorable artistic flair.

WHY?
MOSAIC

STRIKING

Mosaic provides the ability to combine colored accent lighting for the column shaft as well as white light for general illumination.

WHY?

MOSAIC

FLEXIBLE

Available in 3 heights. This allows the applicable column height to be incorporated into a project regardless of the scale of the architecture.

VERSATILE

Product family consists of a decorative column only, a decorative column with top mounted luminaire for safety and security lighting, and a bollard.

PRACTICAL

Concealed hardware adds an air of sophistication. This attention to detail (such as a trap door to access debris in the column interior) illustrate the thought into maintaining the complete column.
